

# Filosa BRICKS Basic dimensions

The concept is based on a 40x40x40 cm cube as the basic element. Thanks to the advanced simplicity of the cube, BRICKS offers endless possibilities for unique compositions, combinations and thereby completely individual installations.

The frame is produced of 1,5 mm steel plate, powder coated in standard colors or according to an interior plan. The frame is open in two sides which can be used for a door, perforated steel

plate, upholstered panel or white board. The Bricks cubes can be fixed together to create unique compositions according to the interior plan.

The top of the Bricks compositions can have a table top made of veneer or laminate. Other materials by request.

Any top size is available to create a convenient surface for working together by standing or sitting.

To increase comfort the top of the Bricks composition can be upholstered with matching fabric.

For upholsteries, any size is available. Fabric according to the interior plan.

## Door

BRICKS has a wide selection of material options for doors. For the edges you can choose between visible veneer edge or ABS-edge. For more information, see Colors and Materials.

Square and round locker handles are available as standard. Other handles by request. For locks we offer any suitable system from the market. Ask for more information.

## Shelf

The BRICKS cubes can be equipped with adjustable shelves made from steel plate or laminate.

## Acoustic wall

The BRICKS locker units can have an upholstered back panel for noise absorption, or just for nice decoration. Any fabric from an interior plan can be used.

## Castors

Castors are available in two sizes depending on the size of the BRICKS composition. Castors are also available with brakes.

## Legs

Legs are a good choice for larger or higher BRICKS compositions to guarantee safe use of the product.
